## Growing Together

### **PNEUMATIC DIRECT SEED DRILL**

### **GIGANTE PRESSURE**

#### **MASCHIO GASPARDO'S NO-TILL TECHNIQUE**

GIGANTE PRESSURE is the most advanced direct seed drill with pneumatic seed and fertilizer distribution. The dual pressurized hopper delivers a stable product dosing for an homogeneous crop covering. Thanks to the lower hopper barycenter, the maneuverability of GIGANTE PRESSURE is very easy on hilly conditions. The MASCHIO GASPARDO's unit has been projected to ensure a reliable sod seeding in all soil conditions, also very hard and wet. Units are lined up in two rows thus offering a great soil and crop residues flow.

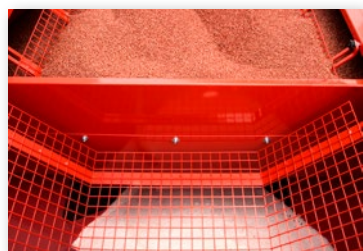

#### **New frame concept**

- Welded strong frame: easier maintenance
- 2 rows of seeding units: optimal residue flow
- Lower barycenter: extreme stability on hilly condition

#### **Pressurized and centralized hopper**

- Uniform distribution: homogeneous crop coverage
  - Less HP required: save money
  - Ergonomic tank: easier cleaning operations
- External distribution head: more space for seed/fertilizer

#### **Twin distributor**

- Two operations in one pass: save money
- Localized fertilizing: more efficient distribution
- Interchangeable distribution rollers

#### **ISOBUS technology**

- One cable and one monitor required: simplified settings
- All operations controlled from monitor: increased comfort
  - GENIUS MASTER seeding management system
  - GPS predisposition for automatic guide

## GIGANTE PRESSURE

Unit adjustment spring

Soil scrapers with wide plate

Interchangeable depth limiter

Toothed disc coultter

Closing wheel pressure spring

Independent closing wheel arm

Cast-iron closing wheel

Cast-iron suffolk

### Technical data

MODEL	Working width cm	Units n°	Row spacing cm	Hopper l	Transport width cm	Weight kg
GIGANTE PRESSURE 400	400	22 (26)	18 (15)	1.860 S + 980 F	310	4.505
GIGANTE PRESSURE 500	500	28	18	2.240 S + 1.170 F	310	5.900
GIGANTE PRESSURE 600	600	33	18	2.240 S + 1.170 F	310	6.680
